

## OUR SERVICE LINES

### Business & Strategy

- Market Research & Intelligence Studies
- Corporate & Competitive Strategy
- New Business Cases Market Entry
- Go-to-Market Strategies
- Tactical Plans & Corporate Roadmaps
- Value Chain Analysis

### Project Development Assistance

- Project Implementation
- Prefeasibility & Feasibility Studies
- Engineering System Design
- Geographic Site Assessment
- Energy Systems Modeling & Optimization
- PPA and HPA Purchase Agreement & Business Models
- PMO and Consortium Management

### Investment Advisory

- Analysis & Financial Modeling
- Investment Strategies
- Deal Origination
- Subsidies and Funding Application
- Strategic Due Diligence
- Technical Due Diligence
- Commercial Due Diligence

### Policy & Regulation

- Policy Design & Evaluation
- Regional & National Roadmaps
- Economic Studies
- Workshops & Trainings
- Certification Schemes Design & Development
- Regulatory Framework Analysis & Compliance
- Certification Strategy
- Ex-ante, Midterm & Ex-post Impact Analysis

### Digital Solutions

- Advanced Modeling for PtX System Design & Optimization
- PtX System Design Capability Building & Support Services
- PtX Techno-Economic Datasets
- Web-based Digital Reports & Visualization

## CONTACT US

[www.hinicio.com](http://www.hinicio.com)

Strategy and technical consulting firm specialized in hydrogen and its derivatives, sustainable mobility and industry decarbonization.

With a unique and multidisciplinary team of consultants, we advise governments, companies, and international organizations, including, investment banks, multilateral entities, and venture capital firms.

## INTO THE HYDROGEN INDUSTRY SINCE ITS INCEPTION

### Why to work with Hincio?

Since 2006, Hincio has led the formulation of corporate and national strategies, the development of public policies, advisory on investment decisions, and the execution of hydrogen studies and projects with high technological and economic complexity.

Our mission is to support the transformation of the global energy system.

A PIONEERING VISION WITH A GLOBAL REACH

**+850** PROJECTS  
**+40** COUNTRIES

We support our clients at every stage of their Power-to-X projects, covering the entire value chain.

Our customized training programs enhance hydrogen-related knowledge within your organization, accelerating the learning curve.

We are experts in decarbonization strategies, roadmapping, and electromobility.

We have extensive experience in the certification and regulatory aspects of hydrogen and its derivatives.

From ideas to successful projects, we offer integrated assistance throughout the project development process.

We evaluate Power-to-X plant sites, identify optimal locations, and prepare georeferenced maps of energy infrastructure.

We have an on-site tool for modeling and optimizing Power-to-X project designs, which facilitates efficient strategic and technical decision-making.
